

Punkin Pillow

A Maudie's Cottage Design

This little pillow is just the right size to tuck into the small of your back in your favourite lounge chair, or to add a bit of charm to any corner you put it in. Finished size 17" x 8".

Note: Please read through all instructions before starting the project.

Patterns are already reversed

All seams are ½ "

All seams are pressed open except where noted.

Materials List

1 fat quarter for sides and back of pillow
1 piece of fabric 8"x 9" for the background
Assorted fabric scraps for the appliqué
Half metre of muslin
Fusible web

20-22" zipper
Variegated decorative thread (optional)
Fiberfill stuffing
Threads to match fabric and appliqué pieces

Recommended Tools

Rotary cutter and sharp blades
Ruler and cutting board
Steam iron
Stabilizer
Mechanical pencil

Appliqué pressing sheet (optional)
Sewing machine with zigzag capability
Zipper foot

Cutting

From the fat quarter cut two pieces 6" x 9". Cut one piece 9" x 18". Cut one piece 2" x 18".

From the background fabric cut one piece 8" x 9".

From the muslin cut two pieces 9" x 18"

Centre Panel Instructions

1. Trace the appliqué pieces onto the paper side of the fusible web. They are already reversed for your convenience. Space the pieces far enough apart that you can easily cut out each shape with about a ½" margin all around. Make sure to trace all design elements (such as the curly vine and pumpkin dimension) to the fusible web as well. Cut out the appliqué shapes leaving about ¼" margin around each shape.
2. Iron the cut out shapes onto the *back* of your chosen fabric – follow the manufacturer's recommended settings (but if you've lost them or thrown them away, a good rule of thumb is to use a dry iron on a silk or wool setting).
3. After fusing the appliqué shapes to your fabric and letting it cool, cut out each shape *on the drawn line*. Transfer detail lines like the curly vine to the right side of the appliqué piece. The easiest way to do this, if you don't have a light box, is to hold the appliqué piece up to a window, in daylight, so the light can shine through and expose the detail lines. Trace over these lines with a pencil.
4. Fuse the shapes to the background fabric. (Use the photo as a guide). You may wish to fuse some of the smaller pieces together first before attaching them to the background fabric. For instance, I fused the stems to the pumpkins first, joined the pumpkins together then fused the shapes to the background as one completed piece. If you do not have an appliqué pressing sheet for this step, a piece of parchment paper works just as well. I also completed the detail stitching (vines, pumpkin dimension) before fusing as it is easier to manipulate the smaller pieces under the presser foot.
5. Using either matching or contrasting thread, appliqué the fused pieces to the background fabric. You might find it more comfortable to test your appliqué technique with a few leftover pieces of fabric before starting the project. This will also give you a chance to fine tune the settings of your sewing machine to a stitch length and width you find pleasing. I generally use a stitch width of .7mm and a length of 1.5mm for satin stitch, but you may prefer a wider/narrower width or closer/longer length. Make sure that the swing of the needle catches more of the appliqué fabric, and only a thread or two of the background fabric. After all appliqué is done, give the piece a good press, using steam this time.

Note: Stabilize all appliqué pieces as you sew them – they will look much better and you will be happier with the finished result. Because tear away stabilizer is so expensive, I try to use coffee filters, ironed flat, whenever possible. They are acid free, and tear away easily without harming the appliqué piece. If you are not a coffee drinker, a sheet of plain paper makes a good stabilizer. I prefer to satin stitch my appliqué pieces, but you may like a blanket stitch better. This is a personal choice.

Sewing Instructions

1. Sew a 6 x 9 piece of pillow fabric to each side of the background piece.
2. Using the variegated decorator thread and a favourite fancy design, stitch in the ditch of each seam (see photo).
3. Using the 2 x 18 strip and the 9 x 18 piece of pillow fabric insert the zipper as follows: Fold under and press $\frac{1}{2}$ " along one long edge of the 2 x 18 strip. Using a zipper foot and with the zipper facing up sew this folded edge, right side up, to the right hand side of the zipper tape. You want to sew as close to the zipper teeth as possible. Make sure the excess zipper is equally spaced at each end of the fabric strip. Fold under and press about $\frac{5}{8}$ " to $\frac{3}{4}$ " along one long edge of the 9 x 18 pillow back fabric. Place this folded edge on the zipper tape covering the stitching on the other side, (forming a lapped zipper) and using the zipper foot, stitch this piece to the zipper on the left side of the zipper tape. Make SURE to sew this second side in the same direction that you sewed the first side to prevent the fabric from twisting and stretching. Open the zipper half way and bar tack across the open end to secure (so the zipper pull doesn't fall off when you trim the zipper).
4. Making sure the zipper is open about half way, pin the pillow front to the pillow back at the top, right sides together, and sew around all four sides. Use the front side of the pillow as a guide to sew the bottom, then trim the excess from the bottom back. If you wish, you can serge or overcast these seams. Trim the corners and turn right side out. Press.
5. Pin the two pieces of muslin right sides together and sew around three sides. Back stitch at beginning and end. Turn right side out and stuff with fiberfill until you have a pillow size that is pleasing to you. Sew up the last side by hand or machine. Insert into the completed case.
6. Admire your handiwork.
